

Pennsylvania Public Education Survey

1. What are the strengths and weaknesses of Pennsylvania's system of funding public education? What should the Pennsylvania legislature do, if anything, to improve the system of funding public education?
2. How should the Pennsylvania legislature assist school districts to meet the requirements of Pennsylvania's regulations for academic standards and graduation requirements as well as the federal No Child Left Behind Act (NCLB) that expects every student to demonstrate proficiencies on state assessments in reading, math and science by 2014, and for all schools to demonstrate "adequate yearly progress" (required by NCLB) toward that goal?
3. How should the Pennsylvania legislature assist school districts to close the academic achievement gaps that exist among groups of students in schools and school districts across the Commonwealth?
4. What, if anything, should the Pennsylvania legislature do to increase access for young children in Pennsylvania to high-quality pre-K programs and full-day kindergarten programs?
5. What is your vision of the public education opportunity that should be available to every child in Pennsylvania and what will you do to accomplish that goal?
6. Is there anything else that you will do to strengthen Pennsylvania's public education system?
